Unidentified Person Data Collection Guide

New York State Division of Criminal Justice Services 80 South Swan Street, Albany, New York 12110

www.criminaljustice.ny.gov

NYS Missing Persons Clearinghouse

The Missing Persons Clearinghouse is staffed by professionals with extensive experience handling missing person cases. They support law enforcement officials investigating cases involving children under 21, college students and vulnerable adults who have gone missing. The Clearinghouse:

- Provides support to family members of children, college students and vulnerable adults who are missing, and offers community education programs;
- Administers three alerts that quickly disseminate information about a child, college student or vulnerable adult who is missing and at risk of harm;
- Publicizes cases at the request of family members and law enforcement online, through social media and the distribution of printed and electronic posters;
- Provides short- and long-term investigative assistance to law enforcement; and
- Trains police officers and develops and distributes procedures and best practice guides for law enforcement agencies.

The Clearinghouse operates a toll-free hotline for case intake and leads: 800-346-3543

Alert Program

The Clearinghouse activates three types of alerts:

Missing Child Alert: Activated when a child younger than 21 is missing and believed to be in danger due to special circumstances, such as a cognitive impairment or medical condition, that place them at serious risk of harm or death.

Missing College Student Alert: Activated when a college student of any age is missing and is deemed to be at credible risk of harm or death.

Missing Vulnerable Adult Alert: Activated when an individual who is 18 or older; has a cognitive disorder, brain injury or mental disability; is reported missing; and is at credible risk of harm. This includes individuals with autism, dementia or Alzheimer's disease.

Alerts are only activated at the request of police agencies. Family members should contact their local agency as soon as their loved one goes missing.

Within minutes of an alert activation:

- Information about the person is distributed to police agencies, the media, Thruway plazas and toll barriers, airports, bus terminals, train stations, hospitals and other locations.
- Details are displayed on highway signs for up to eight hours.
- Information is shared via Facebook (www.facebook.com/nyspublicsafety), Twitter (@NYSPublicSafety) and online (www.criminaljustice.ny.gov).
- NYAlert subscribers are notified immediately. Visit <u>www.alert.ny.gov</u> or call 888-697-6972 to subscribe.

Alerts can remain active for up to 72 hours. If the individual remains missing after that three-day period, case details are posted to www.criminaljustice.ny.gov/missing.

AMBER Alerts, administered by the New York State Police, are activated for abducted children younger than 18 who are believed to be at risk for serious bodily harm or death. www.amber.ny.gov

The Missing Child Alert, Missing College Student Alert and Missing Vulnerable Adult Alert or non-alert assistance can be requested via the eJustice Integrate Justice Portal (IJ Portal) system, in the missing person record modify screen.

Coding Dental Characteristics - Dental Codes and Descriptions
Coding Dental Characteristics - Entry Rules for NCIC Dental Characteristics

This guide supersedes all previous versions of the DCJS-1507/NYSP CB-7A for reporting unidentified persons, in accordance with the provisions of §838 of the NYS Executive Law.

INSTRUCTIONS

ALL CORRESPONDENCE AND MATERIALS SENT TO NYS DCJS MUST INCLUDE: NCIC Record Number Agency Name Suspected Name of the Person (if known) ORI Number Agency Case Number QUESTIONS? Call NYS DCJS Missing Persons Clearinghouse at 1-800-346-3543 GENERAL GUIDELINES FOR HANDLING UNIDENTIFIED PERSON CASES NOTE: This Data Collection Guide is designed to assist in the investigation of unidentified deceased persons. However, it should also be used when investigating unidentified living persons (e.g., when the victim is an abandoned child, an adult suffering from amnesia or Alzheimer's disease). Information pertaining to unidentified living adults should only be entered into DCJS and NCIC unidentified person files if the adult gives consent or is physically or mentally unable to give consent. NYS Executive Law §838 states: "Every county medical examiner or coroner shall furnish the division (NYS DCJS) promptly with copies of fingerprints on standardized eight inch by eight inch fingerprint cards, personal descriptors and other identifying data, including the date and place of death, of all deceased persons whose deaths are in a classification requiring inquiry by the coroner where the deceased is not identified or the medical examiner or coroner is not satisfied with the decedent's identification." Also. "the county coroner or medical examiner shall cause a dentist authorized to practice to carry out a dental examination of the deceased. The medical examiner or coroner shall forward the dental examination records to the division (NYS DCJS) on a form supplied by the division for that purpose." Upon receipt from a medical examiner, coroner or law enforcement agency, NYS DCJS compares fingerprints, dental records and other descriptive data on file for purposes of determining the identity of the deceased. There must be an unidentified person entry in DCJS and NCIC files in order for a comparison to be made against missing person files. Dental data can only be updated if the investigating law enforcement agency (or NYS DCJS) has previously entered the unidentified person into DCJS and NCIC files. CATEGORIES FOR ENTRY INTO THE DCJS/NCIC UNIDENTIFIED PERSON FILE Deceased (EUD): A person no longer living whose identity cannot be ascertained. This category also includes recovered 1. body parts when a body has been dismembered. 2. Living (EUL): A person who is living and unable to ascertain his or her identity (i.e., amnesia victim, infant). The information on unidentified living persons should be included only if the person gives his or her consent or if they are physically or mentally unable to give consent.

3. Catastrophe Victim: (EMV): A person of any age missing after a catastrophe.

(1) NCIC Initial Entry Report - A copy of this report is located on pages 4 and 5. It should be completed by the medical examiner/coroner, usually in collaboration with the investigating officer. Normally, the investigating officer is responsible for ensuring that information is <u>immediately</u> entered into DCJS and NCIC files. To expedite entry of information into files, the format of the report (including codes) follows eJusticeNY Integrated Justice Portal screen formats.

- ✓ All unidentified person reports received at DCJS must have the NCIC assigned "U" number listed. If a law enforcement agency requests assistance, the NYS DCJS Missing Persons Clearinghouse can assist with making the entry.
- ✓ Photographs, X-rays, DNA Samples: To aid in the identification, it is strongly recommended that the following be completed/obtained prior to burying or cremating a body.
- Photographs of the entire body/close-up photographs of all scars, marks and tattoos.
- A full body x-ray.
- Dental x-rays/photographs.
- DNA sample(s).

(2) Medical Information - The *Medical Information* form (*page 6*) should be completed by the medical examiner/coroner and investigating officer. The investigating agency should ensure that all information is promptly added to the DCJS/NCIC unidentified person record.

(3) Personal Descriptors - The Antemortem Personal Descriptors - Scars, Marks, Tattoos and Other Characteristics form (pages 8-19) should be completed by the medical examiner/coroner. The investigating agency should ensure that all information is promptly added to the DCJS/NCIC unidentified person record.

(4) Jewelry Type - Information about jewelry should be documented on the *Jewelry Type* Form (*page 20*) by the medical examiner/coroner or investigating officer. The investigating agency should ensure that all information is promptly added to the DCJS/NCIC unidentified person record.

(5) External Characteristics Body Diagrams - These sheets (*pages 21-24*) should be used by the medical examiner/coroner or investigating officer to indicate precise locations of scars, marks, tattoos and other characteristics. The investigating agency should ensure that all information is promptly added to the DCJS/NCIC unidentified person record.

(6) Internal Characteristics Coding Sheet - This sheet (*page 25*) should be used by the medical examiner/coroner or investigating officer to describe additional physical characteristics that may not be readily visible, including surgeries and missing organs. The investigating agency should ensure that all information is promptly added to the DCJS/NCIC unidentified person record.

(7) Coding Dental Characteristics - Dentists should use this section to record and code dental characteristics for unidentified individuals. Coding worksheets, reports and guidelines are included in this section (pages 27-33). The investigating agency should ensure that all information is promptly added to the DCJS/NCIC unidentified person record.

- NYS Executive Law §838 requires that a "county coroner or medical examiner shall cause a dentist authorized to practice to carry out a dental examination of the deceased. The medical examiner or coroner shall forward the dental examination records to the division (NYS DCJS) on a form supplied by the division for that purpose."
- ✓ When dental history information is received, it can be entered into DCJS/NCIC files by the investigating law enforcement agency or it can be forwarded to the NYS DCJS Missing Persons Clearinghouse for entry. Dental charts and x-rays MUST be forwarded to NYS DCJS/MPC for storage, even if the initial entry is made by the investigating police agency. The NCIC "U" number MUST accompany all submissions.

(8) Images - Images of the unidentified person (i.e., photos) should be obtained, entered into NCIC and associated with the unidentified person record.

(9) When the unidentified person has been identified

- ✓ Send a cancellation message via the eJusticeNY Integrated Justice Portal.
- DCJS will purge files and return all original documents and/or x-rays to the investigating agency.

MEDICAL INFORMATION

Name of Investigating AgencyMedical Examiner/Coroner's NameME/C Case Number

Street Address

City, State, Zip

Investigating Officer

After completing this page, use the Antemortem Personal Descriptors and check any information that would aid in the identification of the unidentified person, for example, broken bones, scars, deformities, and tattoos, and/ or complete the External Characteristics Body Diagrams and the Internal Characteristics Coding Sheet. Dental information should be recorded using the NCIC Unidentified Person Dental Report.

To aid in the identification, please obtain full body and dental X-rays before the body is buried/cremated. This will eliminate the need for a buried body to be exhumed.

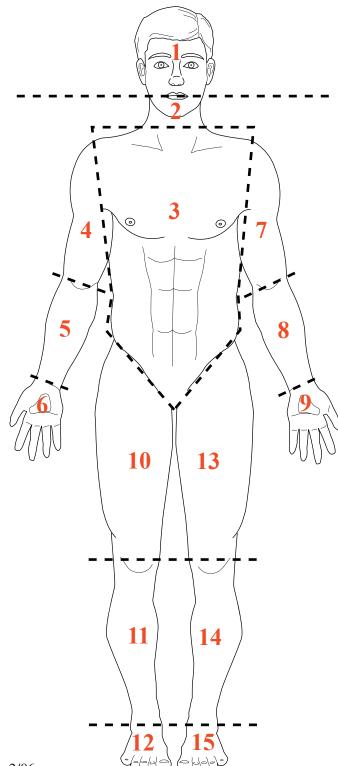

Review the initial Unidentified Person Report to ensure that all available data has been recorded when your examination is complete.

Body Parts Status Chart

The purpose of the body parts status chart is to link information from two or more agencies that recover parts of one body. Review the following diagram and mark the appropriate code on each line.

Body parts that were amputated prior to death for which the remaining tissue has healed should be coded as recovered in the Body Parts Status Field and should be coded in the Scars, Marks, Tattoos, and Other Physical Characteristics Field using the missing body parts codes.

- N Not Recovered
- **D** Recovered-Decomposed
- **F** Recovered-Fresh

ANTEMORTEM PERSONAL DESCRIPTORS SCARS, MARKS, TATTOOS, AND OTHER CHARACTERISTICS

The following is a list of personal descriptors in order, from the head down to the foot area. Please read them carefully and place a check mark (\checkmark) in the corresponding boxes for the descriptors that most closely describes the physical characteristics of the subject **prior to death**.

Artificial (ART) Body Parts and Aids

EYES

- □ Artificial eye, nonspecific (ART EYE)
- □ Artificial left eye (ART L EYE)
- □ Artificial right eye (ART R EYE)
- □ Contact lenses (CON LENSES)
- □ Glasses (prescription) (GLASSES)

EARS

- □ Artificial ear, nonspecific (ART EAR)
- Artificial left ear (ART L EAR)
- Artificial right ear (ART R EAR)
- □ Hearing aid (HEAR AID)

TEETH

- □ Braces on teeth (BRAC TEETH)
- □ Gold tooth (GOLD TOOTH)
- □ Silver tooth (SLVR TOOTH)
- □ Upper denture only (DENT UP)
- □ Lower denture only (DENT LOW)
- □ Upper and lower denture (DENT UP LO)

LARYNX

□ Artificial Larynx (ART LARYNX)

SHOULDERS

- □ Artificial shoulder joint (ART SHLD)
- □ Artificial left shoulder (ART L SHLD)
- □ Artificial right shoulder (ART R SHLD)

TORSO

- □ Artificial breast, nonspecific (ART BRST)
- □ Breast implant, left and right (ART BRSTS)
- Breast implant, left (ART L BRST)
- □ Breast implant, right (ART R BRST)

ARMS

- □ Artificial arm, nonspecific (ART ARM)
- Artificial left arm (ART L ARM)

□ Artificial right arm (ART R ARM)

ARMS - CONTINUED

- □ Artificial elbow joint (ART ELBOW)
- □ Artificial left elbow (ART L ELB)
- □ Artificial right elbow (ART R ELB)
- □ Artificial hand, nonspecific (ART HAND)
- □ Artificial left hand (ART L HND)
- □ Artificial right hand (ART R HND)

LEGS

- □ Artificial leg, nonspecific (ART LEG)
- □ Artificial left leg (ART L LEG)
- □ Artificial right leg (ART R LEG)
- □ Artificial hip joint, nonspecific (ART HIP)
- □ Artificial hip joint, left (ART L HIP)
- □ Artificial hip joint, right (ART R HIP)
- □ Artificial knee joint, nonspecific (ART KNEE)
- □ Artificial knee joint, left (ART L KNE)
- □ Artificial knee joint, right (ART R KNE)
- Artificial foot, nonspecific (ART FOOT)
- □ Artificial left foot (ART L FT)
- □ Artificial right foot (ART R FT)

WALKING AIDS

- \Box Cane (CANE)
- Crutches (CRUTCHES)

* Identify other medical disorders/conditions, not listed above, in the Miscellaneous Field.

Therapeutic Drugs (TD)

Analgesics - pain relievers (includes Darvon, Acetaminophen, and	Cardiac - heart medications (includes Digitalis and Digoxin)
Aspirin) (TD ANALGES)	(TD CARDIAC)
Antibiotics (TD ANTBTCS)	Hypnotics - sleeping aids (includes Barbiturates, Chloral Hydrate, and
Anticonvulsants - seizure medicines (includes Dilantin, Mysoline, and	Glutethemide) (TD HYPNOTI)
Phenobarbital) (TD ACONVUL)	Insulin (TD INSULIN)
Antidepressants - mood lifters (includes Amitriptylene, Elavil, Prozac,	Ritalin (TD RITALIN)
Norpramine, Triavil and Zoloft) (TD ADEPRES)	Tranquilizers (includes Valium, Thorazine, and Stellazine)
Anti-inflammatory medication (TD ANTINFL)	(TD TRANQUI)
Bronchial dilators (includes inhalers) (TD BRNCHDL)	Other therapeutic medications* (TD OTHER)

Information for entering agency:

* Identify other therapeutic medications, not listed above, in the Miscellaneous Field.

Drugs of Abuse (DA)

- □ Alcohol (DA ALCOHOL)
- □ Amphetamines (includes stimulants) (DA AMPHETA)
- Barbiturates (DA BARBITU)
- □ Cocaine (includes crack) (DA COCAINE)
- □ Glue (DA GLUE)
- □ Hallucinogens (DA HALLUCI)
- □ Marijuana (DA MARIJUA)

- Narcotics (includes Heroin, Morphine, Dilaudid, Methadone) (DA NARCOTI)
- □ Paint (includes thinner) (DA PAINT)
- □ Ritalin (DA RITALIN)
- □ Rohypnol (brand name for Flunitrazepam, also referred to as "rophies", "roofies", "ruffies", and "roche") (DA ROHYPNL)
- □ Other drugs of abuse* (DA OTHER)
- Information for entering agency:

* Identify other drugs of abuse, not listed above, in the Miscellaneous Field.

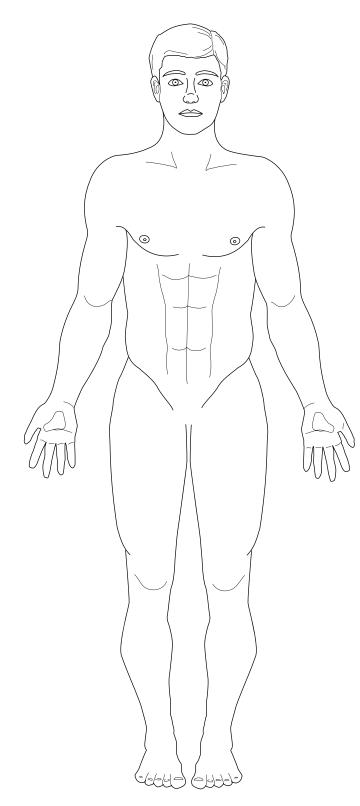

JEWELRY TYPE (JWT)

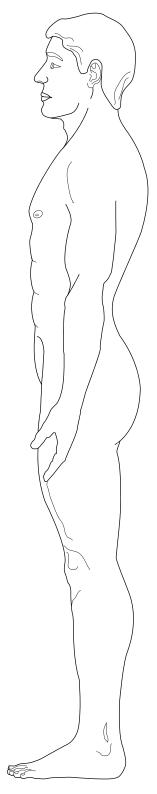

The following is a list of personal accessories. Please review the list carefully and place a check mark (\checkmark) in the box beside any item that the unidentified person had in his/her possession. Describe each item in detail in the space provided.

Jewelry Type	Description of item
Ankle bracelet (AB) (includes ankle bracelet with pendant)	
Backpack (BK)	
□ Belt buckle (BB)	
□ Broach or pin (BP)	
Cigarette lighter, holder, or case (CL)	
Comb (includes hair combs and picks) (CO)	
□ Cuff links (CU)	
Earrings (ER) (includes clasp, pierced, and pendant earrings)	
□ Key chain (KC)	
□ Money clip (MC)	
□ Necklace (NE) (includes necklaces with pendant or watch)	
Pocket knife (PK)	
Pocket watch chain (fob) or vest chain (PC)	
□ Ring (RI)	
□ Tie chain, clasp, or tack (TC)	
□ Wallet or purse (WP)	
□ Watch (WA) (includes wrist, pocket, or stopwatch)	
Wrist bracelets having pendants (WB) (includes ID and medical alert bracelets)

Rev 2/06

Back

Internal Characteristics Coding Sheet

This sheet may be used by the medical examiner/coroner to list or describe additional characteristics that may not be readily visible, such as surgical procedures and missing organs. Information documented on this sheet should be coded by the NCIC operator and added to the unidentified person record.

Images

Images that may assist in identifying a unidentified person should be entered into NCIC and associated with the unidentified person record.

The types of images that can be stored for a unidentified person are mugshot, signature, and identifying images.

- **Mugshot:** Only one mugshot may be entered per record.
- **Signature:** Only one signature may be entered per record.
- IdentifyingNot more than ten identifying images (other than mugshot and signature) may be associatedImages:with one record.

CODING DENTAL CHARACTERISTICS Letter to Dentist

Dear Doctor:

This section was designed to facilitate the collection of dental data to be entered into the National Crime Information Center (NCIC). These dental data will be compared to dental characteristics stored in the NCIC Wanted Person and Missing Person Files to generate a candidate list of potential matching records. It should take you only a few minutes to complete the NCIC Dental Coding Form if you already gathered the appropriate information concerning the unidentified individual or remains.

Since radiographs are the most widely used comparison medium for the dental identification of unidentified human remains, your experience and expertise in taking and reviewing radiographs plays an important role in the gathering of identification evidence. Guidelines for the specific radiographs that need to be taken are found on page 28 of this packet. Photographs, either conventional or digital, can also be helpful in the identification process as explained on page 28 of this packet.

Because radiographs are two dimensional, it is also important that you perform a thorough visual examination to record the specific condition of the dentition. A worksheet for your notes in regard to each tooth is also contained in this packet on page 29. Using this worksheet will enable you to combine the information obtained from the visual examination with the information observed in the radiographs to provide an accurate dental profile of those teeth that have been recovered. Once you have completed the worksheet, you can easily transfer your notes to the NCIC Unidentified Person Dental Coding Report found on page 30.

Thank you for your careful completion of this report. Please be sure to retain all dental records for future comparison purposes. You should provide the original (or diagnostic copies of) radiographs, photographs, and documentation to the investigating agency and the medical examiner/coroner of jurisdiction.

If you have any questions regarding the reporting of a condition, contact the **FBI's CJIS Division at** (304) 625-3000.

Dental Data Checklist (to be completed by dentist)

- □ Panoramic Radiograph if possible. (See page 28.)
- \Box Full Mouth Series of Radiographs. (See page 28.)
- □ Photographs of Oral Structures. (See page 28.)
- □ Completed Dental Conditions Worksheet. (See page 29.)
- □ Completed NCIC Unidentified Person Dental Report. (See page 30.)

Dental Radiograph Guidelines for Unidentified Remains

- □ All periapical radiographs should show the complete crown and root tips with surrounding tissue. Avoid elongation and foreshortening as much as possible.
- \Box Radiographs should be taken of region even if teeth are missing.
- \Box Use bisecting angle or parallel technique.
- □ Obtain panoramic radiographs whenever possible. (Usually only possible in skeletal remains.)
- □ Submit one set of original radiographs and completed charting to the medical examiner or coroner of jurisdiction.

Guide to Full Mouth Radiographic Series

Recommended Dental Photographs

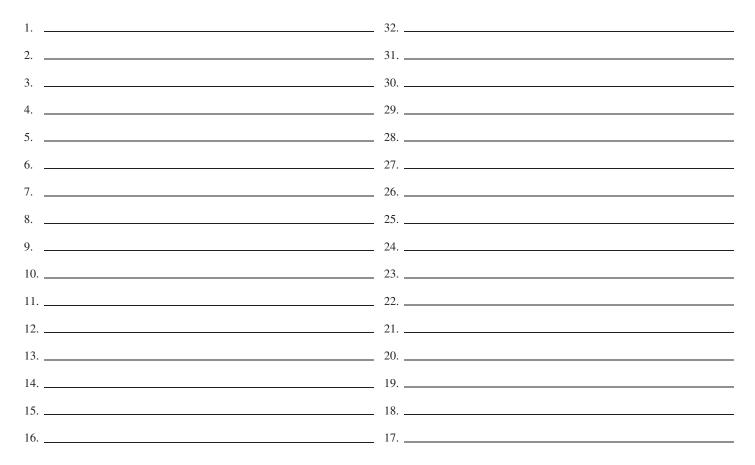

Photographs are occasionally used to help identify unidentified persons. This can be done by comparing the alignment and shape of the visible teeth in an antemortem photograph to those same characteristics present in the recovered human remains. Photographic superimposition of the head over photographs of possible candidates may also be useful. Multiple photographs, either conventional or digital are recommended. At a minimum, the following photographic views should be taken:

- 1. View of Anterior Teeth (cuspid to cuspid) showing incisal edges and alignment.
- 2. Frontal View of Head.
- 3. Right and Left Lateral View of Dentition.
- 4. Occlusal View of Dentition Upper and Lower.

DENTAL CONDITION WORKSHEET

(to be completed by dentist)

You should fill out this chart following the complete visual examination of the dentition and review of the dental radiographs taken of the unidentified individual or remains. You should number the teeth following the format of the Universal numbering system with tooth #1 being the upper right third molar, tooth #16 being the upper left third molar, tooth #17 being the lower left third molar and tooth #32 being the lower right third molar. In your descriptions of the restorations present, you should include the surfaces involved (M, O, D, F, L), the restorative material used, such as amalgam, gold, porcelain, composite, temporary cement, and any other conditions that may be observed, such as endodontic treatment, pin retention, orthodontic brackets or bands. You must not leave any tooth numbers blank. If the tooth has no restorations, note it as "virgin" or "present, no restoration." Note other significant dental information at the bottom of this chart or on an additional sheet of paper, which you should attach to this worksheet.

SECTION 3

DENTAL CODES

- \mathbf{X} = Tooth has been removed or did not develop
- \mathbf{V} = Tooth is present and unrestored
- **M** = Mesial Surface Restored
- **O** = Occlusal/Incisal Surface Restored
- \mathbf{D} = Distal Surface Restored

- \mathbf{F} = Facial or Buccal Surface Restored
- $\mathbf{L} =$ Lingual Surface Restored
- C = Lab Processed or Prefabricated Restoration
- \mathbf{R} = Endodontic Treatment
- / = Postmortem Missing or Not Recovered (Default Code)

(*The codes V and / are used differently in the Unidentified Person Report than in the Missing Person Dental Report.)

SECTION 4

DENTAL REMARKS

 \Box ALL (All 32 teeth are present and unrestored)

UNK (No dental information available)

General Procedures for Coding the Report

(to be completed by dentist)

Section 1:

- The NCIC # field should be completed by the investigating agency.
- The Medical Examiner/Coroner Case #, Completed by, Date Completed, Address, Telephone #, Email Address, X-Rays Available, Dental Models Available, and Dental Photographs Available fields should be completed by the individual filling out the report.

Section 2:

- If no dental information is available, go directly to Section 4 and check the UNK box. Do not enter any codes in the tooth fields.
- If all 32 teeth are present with no restorations, go directly to Section 4 and check the ALL box.
- Review pages 32 and 33 prior to completing the Dental Characteristics Section of the dental report.
- Tooth numbers are based on the Universal System. The corresponding Federation Dentaire Internationale (FDI) System numbering is depicted in parenthesis.
- Use all available dental evidence to capture the most accurate dental profile.
- Enter the appropriate code(s) next to the corresponding tooth number, 01–32, on the dental report.
- Each tooth must have one or more codes entered except when ALL or UNK is used in Section 4.

Section 3:

• Dental Codes. A more detailed explanation of these codes and their use is provided on page 32.

Section 4:

- Used for coding ALL or UNK.
 - If ALL is marked, NCIC will automatically code all teeth as V.
 - If UNK is marked, NCIC will automatically code all teeth as /. A dental comparison will not be performed by NCIC when this box is marked.
- Used for additional dental characteristics not captured in the dental codes listed in Section 3, for example, dental implants, removable dentures, orthodontic appliances. Specific tooth numbers are not always necessary, and key descriptive words are preferred.

Dental Codes and Descriptions

Primary Dental Codes - One or more codes must be entered for each tooth.

Description Code / Default code for Unidentified Persons. Typically used when the tooth is not recovered. Also used when a portion of the tooth is remaining and it is impossible to determine if the clinical crown has been restored. Note: This code is used differently when coding dental characteristics for **Missing Persons.** V Virgin. Tooth is present and unrestored. This includes unerupted teeth such as wisdom or deciduous teeth. Note: This code is used differently when coding dental characteristics for **Missing Persons.** X Missing. Tooth has been extracted or is congenitally missing. Μ Mesial surface of the tooth has been restored. 0 Occlusal or Incisal surface of the tooth has been restored. D Distal surface of the tooth has been restored. F Facial or Buccal surface of the tooth has been restored. L Lingual surface of the tooth has been restored.

Secondary Dental Codes - Cannot be used independently. Must be used in conjunction with Primary codes.

Code Description

- **C** Any laboratory processed restoration including crowns, inlays, onlays, and veneers. This code also includes prefabricated restorations such as stainless steel crowns, metal and acrylic temporary crowns, and porcelain processed veneers.
- **R** Root canal. Evidence is available to establish that an endodontic procedure has been started or completed.

Entry Rules for NCIC Dental Characteristics

The following rules apply to **each tooth** for the successful entry of dental characteristics into NCIC:

- 1. The DCH Field requires that a code or series of codes be entered for each tooth. The tooth number (01–32) must be followed by option A, B, or C:
 - A. One special character /, or one special character / followed by R.
 - B. One alphabetic character M, O, D, F, L, X, V.
 - C. Two to seven alphabetic characters M, O, D, F, L, C, and R.
- Any combination of M, O, D, F, L should be entered in the sequence of M, O, D, F, L.
- 3. The R character should follow any combination of M, O, D, F, L, C or the / character.
- 4. The C character should follow any combination of M, O, D, F, L.
- 5. The only character that should be used with / is the R character.
- 6. The characters V and X should not be used with any combination of characters.
- 7. The characters M, O, D, F, L, C, R, /, V, and X may be used only once per numeric.

If you have any questions regarding the reporting of a condition, contact the **FBI's CJIS Division at** (304) 625-3000.
